## Direct Screen Vacuum Frames for Direct and Indirect Scenemaking

*Richmond builds top quality, high performance DSVF vacuum frames making them the number one choice among screenprinters.*

*All welded steel construction makes them the work horses of the industry. The raising and lowering action of the DSVF frames is smooth due to the incorporation of gas pistons instead of commonly used springs and counterweights.*

*An oil-less, heavy duty high-pressure vacuum system insures quick draw down and perfect contact for fine screen detail. Optically clear 3/8" or 1/2" glass with seamed edges is standard.*

*The deep draw vacuum blanket is made with finely textured, flexible natural rubber that has superb UV resistance due to UV inhibitor compounds and enduring elasticity. The UV resistance and elasticity of natural rubber coupled with the fact that there are no vacuum ports piercing the rubber insure long blanket life.*

*Frames are loaded glass down and rotate to the vertical position. Yellow viewing lights, silent air pump, and casters are available as options.*

*Besides the standard sizes listed below, large format custom built frames are available. Please contact Richmond or your Dealer for pricing.*

PRODUCT	SIZE	SHIP WT.
DSVF 4353	43" x 53"	520 lbs
DSVF 5454	54" x 54"	595 lbs
DSVF 5474	54" x 74"	785lbs
DSVF 6084	60" x 84"	865 lbs
DSVF 60140	60" x 140"	1025 lbs
DSVF 7296	72" x 96"	980 lbs
DSVF 8084	80" x 84"	1010 lbs
DSVF 80100	80" x 100"	1100 lbs
DSVF 84120	64" x 120"	1200 lbs
DSVF 84156	84" x 156"	1450 lbs

Sizes listed indicate the maximum screen frame size that can be loaded into the Direct Screen Vacuum Frame for exposure.
